Re: Attard Industries, Inc. v. USFIC

Dear Mike:

I just wanted to take a moment to let you know what a great job I thought you and your team did with the litigation of the Attard/USFIC matter in federal district court in Alexandria, Virginia. The case involved some very complicated factual issues concerning the mechanical work and less than ideal circumstances concerning the records maintained by the parties on the job. Nevertheless, you and your team were able to sift through and make sense of the multitude of performance problems that were important to the case and provide valuable and fresh insights for our trial team. I also thought that you personally provided strong analysis and trial testimony in support of our case. In short, we would not have been able to present the strong defense that we were able to articulate for the jury without the assistance of you and your team.

I would not hesitate to use you and your people again in future matters.

Very truly yours,

Seeger Faughnan Mendicino, PC
