Dear Mike & Jim,

When scheduling a training course for my members that are so diverse in size, scope and how they operate as a business, there is always a concern that the curriculum will benefit and be of value to ALL that intend. Having sat through this course myself, I can wholeheartedly attest that this seminar did just that and then some.

I knew I hit a home run with offering this course when less than 2 hours into the class during the first break, I overheard multiple attendees from different companies talking about "all the *OTHER* people back at the office who *SHOULD* have also been there."

You guys did a great job, content, delivery and all around, providing my members with very useful information that applies to all of them regardless of their concentration in the industry that will benefit them for many jobs to come.

Very truly yours,

Peter Stoller
Executive Director
